Company description

SP Group is a Danish-based manufacturing company producing advanced plastic and composite components and performs coatings on plastic and metal products. It produces products under its own trademarks and products for other firms as a sub-supplier. SP Group operates globally, with 71% of global sales in Europe (25% of which in DK). Additionally, the group supplies a variety of industries, with healthcare, cleantech, and food-related industries being the three largest, together 82% of sales in 2024.

Investment case

SP Group's moulded plastics segment experiences structural support as customers seek cheap, lightweight, and less carbon-intensive alternatives to metal/glass components, projected to grow at a CAGR of 7%^[1] from 2024 to 2030.

The company maintains its 'buy and build' strategy, based on organic and acquisitive growth, which has led to revenue and EBT CAGR of 10% and 21%, respectively, from 2014-2024. SP Group can continue to consolidate in a fragmented market with a strong balance sheet (NIBD/EBITDA 1.4x LTM), delivering on customer demands for fewer, larger suppliers with nearshored supply chains. Shareholder returns via share buybacks and/or dividends may be boosted near term in the absence of M&A opportunities.

Following a record Q1 2025, activity weakened in Q2 and Q3 as customers postponed projects, especially own-brands, amid tariff uncertainty. Despite recent softness, several delayed healthcare and industrial projects are now scheduled for Q4, suggesting a stronger year-end (despite limited visibility). The US factory can support group results from 2026 onwards after production ramp-up costs, with negative EBT DKK 20-22m in 2025, with higher-margin own-brand production.

SP Group trades below its peers' trading multiples, particularly on EV/EBITDA and EV/EBIT. There may be room for valuation multiples to expand if SP Group can deliver growth in the face of tariffs.

Key investment reasons

SP Group's strategy is to grow organically across its international markets, while opportunistically acquiring companies at attractive valuations, which expand the product portfolio and/or international footprint. A growing share of own-brand sales has driven continual incremental margin improvements over many years. Own brands reached a record 30% of sales in 2024, despite declining YTD 2025.

The buy-and-build strategy focuses on acquiring businesses with cross-company synergies at attractive valuations. A lack of major acquisitions since 2022 has seen the leverage ratio fall to NIBD/EBITDA 1.4x (low-end of its 1.0-3.5x target), which can support future acquisitions or higher levels of share buyback in the interim.

SP Group's largest segments, H1 2025, Healthcare (40%), Cleantech (27%), and Foodtech (12%), benefit from the macro themes of ageing populations, green energy transition, and global food insecurity, also offering diversification to reduce cyclical risk.

Key investment risks

The emergence of a global trade war will likely disrupt global markets in unforeseen ways, impacting global trade and global economic strength. Despite SP Group having local production in the US and China and diversification across business areas management expects tariffs to weigh on growth in 2025.

SP Group's ten largest customers contributed 53% of revenue in 2024, with its largest customer contributing 13.9%, suggesting SP Group faces some concentration risk. Loss of a key customer would be material despite concentration generally declining and higher healthcare customer switching costs adding to stickiness.

SP Group has not made major acquisitions in recent years, as elevated interest rates shifted focus to reducing debt. While interest rates have retreated, global uncertainties and forecasting difficulties may raise the risk that new acquisitions do not develop as initially forecasted or defer the timeline for M&A activity.

Selected plastic-related manufacturer peers overview:

Peer group overview: SP Group's peer group consists of peers engaged in the manufacture of plastic products, with multiple product segments and international operations. While there is no identical peer to SP Group, we believe drawing comparisons between SP Group and the following peers is appropriate.

Polytech Holding: is based in Austria, is a prominent manufacturer of high-quality plastic components, specialising in the automotive, aerospace, and industrial sectors. The company's product portfolio includes interior and exterior automotive components, structural parts, and engine bay components. Additionally, Polytec offers engineering and consulting services to support the development of innovative products and manufacturing processes.

Nolato: is a Swedish-based leading international manufacturer of polymer-based products and systems. The company operates through three key business areas: Nolato Medical, which focuses on advanced medical components and devices; Nolato Industrial, offering customised polymer solutions for a wide range of industries; and Nolato Telecom, providing advanced technology and components for the telecom and electronics sectors.

Gerresheimer: is a German-based leading global manufacturer of high-quality specialty glass and plastic products, primarily for the pharmaceutical and medical industries. The company's product portfolio includes pharmaceutical packaging, drug delivery systems, and medical devices, such as insulin pens, inhalers, and pre-fillable syringes. Gerresheimer also provides services for the development and production of cosmetic packaging and moulded glass containers for the food and beverage industry.

Bewi: is a Norwegian-based manufacturing company specialising in the production of particle foam products and insulated packaging solutions. The company offers a wide range of products that cater to various industries, including construction, packaging, and automotive sectors. Bewi products are designed to provide excellent insulation, protection, and lightweight solutions while minimising environmental impact.
