INDERES CORPORATE CUSTOMER

COMPANY REPORT

Growth in the cards for the rest of the year

Kreate's revenue decreased in Q1 in line with our expectations, with earnings down year-on-year. In our view, the first half of the year will be weak, and growth will be weighted towards the end of the year, reflecting the typical seasonality of the industry. In Kreate's case, projects in the development phase are seen to increase the order book during the early part of the year, which provides good potential for growth as the market recovers. We believe that the valuation of the share is moderate relative to earnings growth in the coming years, and the expected return is supported by a strong dividend yield. After updating our fair value calculation and with our confidence in the positive drivers of the business strengthened, we raise the target price to EUR 8.6 (was EUR 8.0) and reiterate our Accumulate recommendation.

Revenue declined as expected, with earnings slightly down year-on-year

In Q1, Kreate's revenue decreased by 3.7% to around 52.4 MEUR, which was virtually in line with our forecasts (forecast: 52.7 MEUR). The decline in revenue slowed down in the first quarter as comparison periods eased for Structural engineering (Q1 revenue: -14% y/y), Sweden grew strongly (+15% y/y), and railway projects brought growth in Transport infrastructure (+27% y/y). On the positive side, Kreate's order book grew in Q1 by about 23% to 226 MEUR. The development of the order book supports this year's developments well, and we also estimate it will strengthen in the coming quarters as the railway projects in the development phase enter the work phase.

In Q1, the company's earnings decreased from the comparison period to 0.1 MEUR and were slightly below our forecast (forecast 0.3 MEUR). The EBITA margin was thus 0.1%, while we had expected a margin of 0.6%. In our view, profitability was hurt during the quarter by the low volume level and the still tight competitive situation, which in our view is reflected in price competition. At the bottom of the P&L, financing costs were

slightly lower than we had expected, so earnings per share increased to EUR 0.01 (Q1'24: EUR -0.06), also exceeding our forecast of EUR -0.04.

Reiterated guidance indicates growth for the end of the year

In its guidance, Kreate expects its revenue to grow in 2025 to 290-310 MEUR (2024: 275.5 MEUR). EBITA is expected to grow to 9-11 MEUR (2024: 8.8 MEUR). Our current and near-term forecasts remain unchanged, with only minor fine-tuning, and we expect Kreate's revenue to increase by 7% to 295 MEUR in 2025 and adjusted EBITA to increase to 9.9 MEUR (EBITA-%: 3.4%).

Revenue growth will be driven by railway projects coming into the order book in the spring, which we expect to significantly boost growth in the second half of the year. Profitability will be supported by growing revenue volumes and easing cost pressures. We also see the strengthening order book and the recovering market this year leading the company to earnings growth in the coming years (2024-2027 EPS CAGR: 16%). We see the prolongation of project development phases, the postponement of projects, project-related risks, or the continuation of a weak market outlook further into the fall as risks.

Moderate upside in valuation

In our view, Kreate's valuation looks attractive over the next few years (2025-2026e: EV/EBIT 9x, P/E 10x), especially in the current year, given the company's earnings growth and the opportunities created by the market turnaround. This will also bring Kreate's profitability closer to the normalized 4% level. Relying on our 2025-2026 forecasts and acceptable valuation (EV/EBIT: 10-12x, P/E: 10-12x), we believe the stock has moderate upside. In addition, the dividend yield of around 7% generated by the strong cash flow increases the expected return. The DCF calculation is also well in line with our target price (EUR 8.6), supporting our recommendation.

Value drivers

- Above-market growth in the medium term
- Clear room for improvement in profitability
- Strong potential for return on capital
- Infrastructure construction is more cycle-resilient than the rest of the sector
- Competitive advantage through specialized expertise in demanding projects
- Urbanization, dense construction, sustainable development, renovation debt, safety underpin market growth prospects

Risk factors

- The sector is partly dependent on the business cycle, especially on the private side
- Stagnation of public investment
- Managing growth
- Sharing and managing the risks of large projects
- Maintaining expertise and adequacy of staff incentives
- Price competition
- Cost pressures and material availability challenges

Sluggish start to the year as expected

Revenue decreased in line with expectations

In Q1, Kreate's revenue decreased by 3.7% to around 52.4 MEUR, which was virtually in line with our forecasts (forecast: 52.7 MEUR). The top-line decline slowed in the first quarter of the year as projects got underway and the comparison figures eased.

By business area, revenue of the Structural engineering decreased by 14% to 34.5 MEUR, while the Transport infrastructure revenue increased by 27% to 16.9 MEUR, based on projects received. Large bridge projects have decreased, while railway construction projects have increased, which is reflected in the development of the business areas. By country, revenue developed strongly in Sweden, increasing by 15% to 7.5 MEUR, but still falling short of our forecast of 9.1 MEUR. In Finland, on the other hand, business developed slightly better than we expected, with revenue decreasing by 6% to 44.9 MEUR (forecast: 43.6 MEUR).

On the positive side, Kreate's order book grew in Q1 by about 23% to 226 MEUR. The development of the order book supports this year's developments well, and we also estimate it will strengthen in the coming quarters as the railway projects in the development phase enter the work phase.

Profitability developed slightly softer than we expected

Kreate's earnings decreased slightly from the comparison period to 0.1 MEUR and were slightly below our forecast (forecast 0.3 MEUR). The EBITA margin was thus 0.1%, while we had expected a margin of 0.6%. In our view, profitability was hurt during the quarter by the low volume level and the still tight competitive situation, which in our view is reflected in price competition.

At the bottom of the P&L, financing costs were slightly lower than we had expected, so earnings per share increased to EUR 0.01 (Q1'24: EUR -0.06), also exceeding

our forecast of EUR -0.04.

Cash flow growth picked up early in the year

A small positive is the improved cash flow during the first part of the year (operative free cash flow Q1'25: 6.0 MEUR vs. Q1'24: -3.1 MEUR), which was supported by the favorable development of net working capital. Kreate's financial position also remained stable (net debt/adjusted EBITA: 1.6x), and the company's strengthened order book supports growth for the coming quarters. However, successful working capital management continues to play a key role, so cash flow development is still worth monitoring as the year progresses.

Estimates MEUR / EUR	Q1'24	Q1'25	Q1'25e	Q1'25e	Consensus		Difference (%)	2025e
	Comparison	Actualized	Inderes	Consensus	Low	High	Act. vs. Inderes	Inderes

Guidance anticipates growth weighted towards the end of the year

Guidance remained unchanged

In its guidance, Kreate expects its revenue to grow in 2025 to 290-310 MEUR (2024: 275.5 MEUR). EBITA is expected to grow to 9-11 MEUR (2024: 8.8 MEUR). The market situation in construction remains difficult and competition in infrastructure is still tight, in addition to which the deteriorating global economic situation brings uncertainty to the outlook. The near-term outlook for infrastructure remains expectant, with better performance expected towards the end of the year. For Kreate, the Swedish market looks strong at the moment, but the situation in Finland is more stable. In Kreate's case, projects in the development phase are seen to increase the order book during the early part of the year, which provides good potential for growth as the market recovers.

Estimates MEUR / EUR	Q1'24	Q1'25	Q1'25e	Q1'25e	Consensus		Difference (%)	2025e

Our forecasts remain virtually unchanged

The forecasts are based on a recovery in the market in the second half of this year

- Following the Q1 report, we reviewed the company's net financing expenses, which led to an increase in our EPS forecasts for the current and coming years, while our operating forecasts remained largely unchanged
- We expect the infrastructure market to remain quiet in H1'25, with revenue growth picking up towards the end of the year
- Growth will be driven by railway projects not in the order book and under development and projects resulting from a recovering market
- Projects in the development phase are expected to enter the construction phase in the spring and fall of 2025
- Fierce competition is expected to continue this year, reducing the scope for margin improvement
- Margin improvement this year is supported by increased volumes, moderating cost pressures and an increase in the relative share of the more profitable Swedish business
- We expect growth to continue strongly in 2026-2027, as large won projects are fully underway, the order book strengthens and the market grows
- In our view, the recovery of the market will also reduce the prevailing tight competition and the price competition seen in the sector
- Higher volumes and improved project margins as project mix broadens will support margin improvement and earnings growth in 2026-2027

Operational earnings drivers 2025-2027

- Turnaround in the infrastructure market towards growth and rising volumes
- Moderation of cost pressures
- Leverage from rising volumes
- Realization of growth investments in rail construction and Sweden
- Easing of competitive pressure as other new construction recovers

Kreate, Webcast, Q1'25

Moderate upside in valuation

Moderate upside in absolute multiples

With a gradually improving market and a positive earnings trend, we forecast Kreate's earnings to grow in 2025 and bring the valuation down to a neutral level (2025e: EV/EBIT: 10x, P/E: 12x). During 2026, the profit level will start to approach Kreate's normalized level of approximately 4%, at which point the valuation is very attractive (2026e: EV/EBIT: 8x, P/E: 9x). Relying on our 2025-2026 forecasts and acceptable valuation (EV/EBIT: 10-12x, P/E: 10-12x), we believe the stock has moderate upside.

If the market and Kreate's business develop as expected, we see the pricing relying more strongly on the normalized earnings level of the coming years, in which case there would also be more upside in the valuation. The risks related to the prolonged weakness of the economic cycle and the continued tight competition, however, keep uncertainty high and, in our view, the upside potential moderate in the short term. The 7% dividend yield, enabled by the business model's normally strong cash flow and low investment need, supports the share's expected return well in the coming years. Kreate has expressed its intention to pay an increasing dividend, and we believe the company has the potential to do so, even if the dividend/earnings-% rises above 50% in the near future. The business does not require significant investments, and the company also has financing capacity for growth investments.

Valued at a discount compared to peers

A good peer group of Nordic listed companies in the industry is available for Kreate. However, in our view, the peer valuation level for 2025 is reasonably high (2025e median EV/EBIT: 11x, P/E: 13x). For 2026, the valuation

decreases to a more moderate level for the entire peer group (2026e median EV/EBIT: 10x, P/E: 12x) and Kreate trades at approximately a 11-15% discount to the peer group median in both years. In our view, considering Kreate's return on capital employed (2024 ROCE-%: 13.1%) and earnings growth (2024-2027 CAGR: 16%), the discount is not justified, and we currently accept peer-level valuation for Kreate. However, the valuation of peers varies between a clear premium and a discount as forecast uncertainty for the companies is high. In this sense, we believe that relative valuation is not very useful and therefore do not give it significant weight.

The DCF model supports our target price

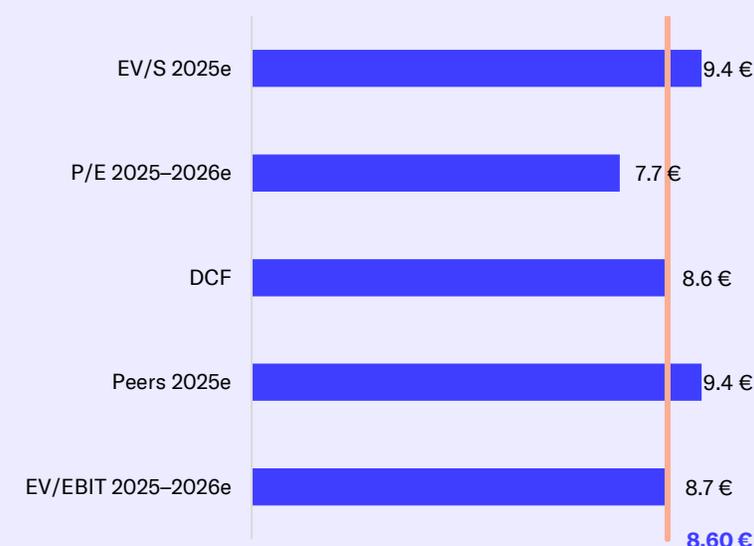

We also use DCF in the valuation. In our model, the company's revenue growth stabilizes at 1.5% in the terminal period after stronger medium-term growth, and the EBIT margin is 3.5% of revenue. This is below the company's target level of over 5% EBITA margin. We do not consider it justified to raise the forecast level to the target level before concrete evidence of higher profitability than in the recent past and in line with the targets.

We have raised Kreate's cost of capital (WACC) to 9.5% to better reflect both the average level of the companies we monitor and Kreate's risk profile relative to the peer group. The cost of equity for Kreate is 11.0%. The DCF model estimates Kreate's share value to be approximately EUR 8.6, which is well in line with our target price.

Disclaimer and recommendation history

The information presented in Inderes reports is obtained from several different public sources that Inderes considers to be reliable. Inderes aims to use reliable and comprehensive information, but Inderes does not guarantee the accuracy of the presented information. Any opinions, estimates and forecasts represent the views of the authors. Inderes is not responsible for the content or accuracy of the presented information. Inderes and its employees are also not responsible for the financial outcomes of investment decisions made based on the reports or any direct or indirect damage caused by the use of the information. The information used in producing the reports may change quickly. Inderes makes no commitment to announcing any potential changes to the presented information and opinions.

The reports produced by Inderes are intended for informational use only. The reports should not be construed as offers or advice to buy, sell or subscribe investment products. Customers should also understand that past performance is not a guarantee of future results. When making investment decisions, customers must base their decisions on their own research and their estimates of the factors that influence the value of the investment and take into account their objectives and financial position and use advisors as necessary. Customers are responsible for their investment decisions and their financial outcomes.

Reports produced by Inderes may not be edited, copied or made available to others in their entirety, or in part, without Inderes' written consent. No part of this report, or the report as a whole, shall be transferred or shared in any form to the United States, Canada or Japan or the citizens of the aforementioned countries. The legislation of other countries may also lay down restrictions pertaining to the distribution of the information contained in this report. Any individuals who may be subject to such restrictions must take said restrictions into account.

Inderes issues target prices for the shares it follows. The recommendation methodology used by Inderes is based on the share's 12-month expected total shareholder return (including the share price and dividends) and takes into account Inderes' view of the risk associated with the expected returns. The recommendation policy consists of four tiers: Sell, Reduce, Accumulate and Buy. As a rule, Inderes' investment recommendations and target prices are reviewed at least 2–4 times per year in connection with the companies' interim reports, but the recommendations and target prices may also be changed at other times depending on the market conditions. The issued recommendations and target prices do not guarantee that the share price will develop in line with the estimate. Inderes primarily uses the following valuation methods in determining target prices and recommendations: Cash flow analysis (DCF), valuation multiples, peer group analysis and sum of parts analysis. The valuation methods and target price criteria used are always company-specific and they may vary significantly depending on the company and (or) industry.

Inderes' recommendation policy is based on the following distribution relative to the 12-month risk-adjusted expected total shareholder return.

Buy	The 12-month risk-adjusted expected shareholder return of the share is very attractive
Accumulate	The 12-month risk-adjusted expected shareholder return of the share is attractive
Reduce	The 12-month risk-adjusted expected shareholder return of the share is weak
Sell	The 12-month risk-adjusted expected shareholder return of the share is very weak

The assessment of the 12-month risk-adjusted expected total shareholder return based on the above-mentioned definitions is company-specific and subjective. Consequently, similar 12-month expected total shareholder returns between different shares may result in different recommendations, and the recommendations and 12-month expected total shareholder returns between different shares should not be compared with each other. The counterpart of the expected total shareholder return is Inderes' view of the risk taken by the investor, which varies considerably between companies and scenarios. Thus, a high expected total shareholder return does not necessarily lead to positive performance when the risks are exceptionally high and, correspondingly, a low expected total shareholder return does not necessarily lead to a negative recommendation if Inderes considers the risks to be moderate.

The analysts who produce Inderes' research and Inderes employees cannot have 1) shareholdings that exceed the threshold of significant financial gain or 2) shareholdings exceeding 1% in any company subject to Inderes' research activities. Inderes Oyj can only own shares in the target companies it follows to the extent shown in the company's model portfolio investing real funds. All of Inderes Oyj's shareholdings are presented in itemised form in the model portfolio. Inderes Oyj does not have other shareholdings in the target companies analysed. The remuneration of the analysts who produce the analysis are not directly or indirectly linked to the issued recommendation or views. Inderes Oyj does not have investment bank operations.

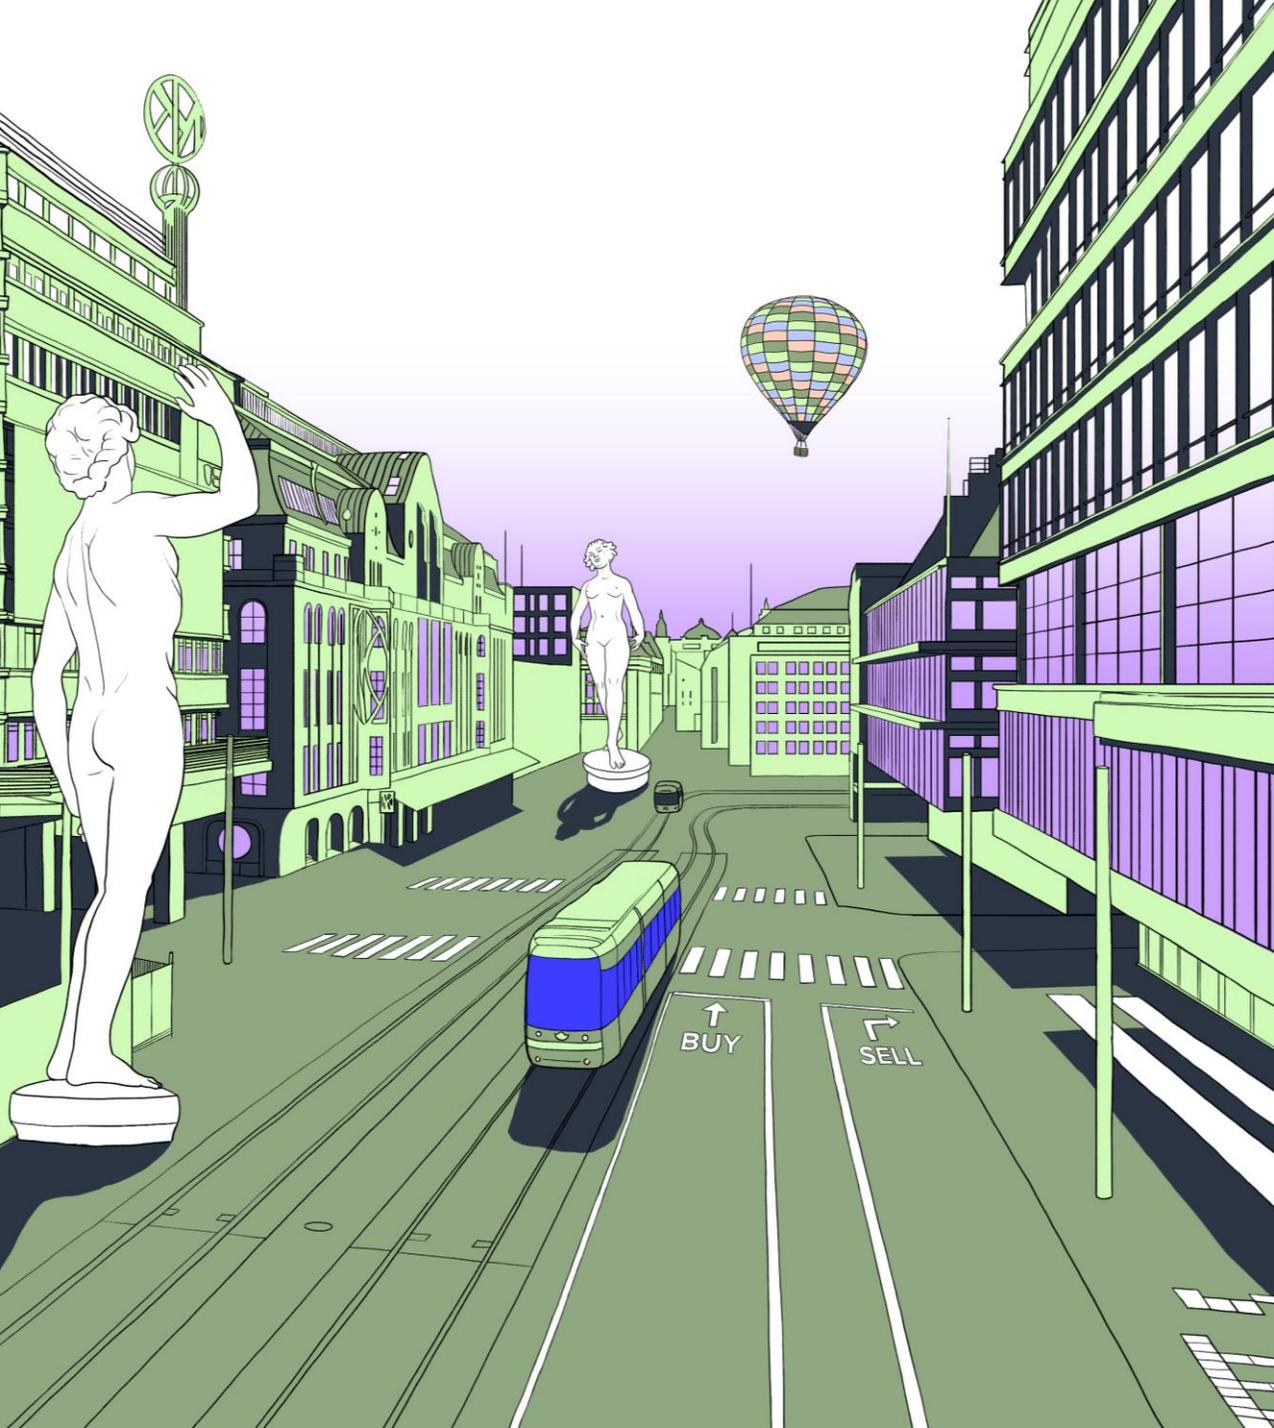

Inderes or its partners whose customer relationships may have a financial impact on Inderes may, in their business operations, seek assignments with various issuers with respect to services provided by Inderes or its partners. Thus, Inderes may be in a direct or indirect contractual relationship with an issuer that is the subject of research activities. Inderes and its partners may provide investor relations services to issuers. The aim of such services is to improve communication between the company and the capital markets. These services include the organisation of investor events, advisory services related to investor relations and the production of investor research reports.

More information about research disclaimers can be found at www.inderes.fi/research-disclaimer.

Inderes has made an agreement with the issuer and target of this report, which entails compiling a research report.
