INDERES CORPORATE CUSTOMER

COMPANY REPORT

Headwinds in the operating environment are easing

The soft earnings performance in Q2 was mainly due to temporary factors. We expect the earnings level to develop more steadily towards the end of the year, thanks to, e.g., volume growth in Food Solutions and improved raw material availability for Oilseed Products. In our view, the company is well-positioned to continue its moderate growth, supported by the increasing domestic consumption of frozen vegetables and exports. The valuation is close to a fair level based on this year's abnormally weak result, but we expect earnings to turn to growth next year, at which point the expected return with the dividend will become sufficiently attractive. We reiterate our Accumulate recommendation and a target price of EUR 15.0.

Temporary factors burdened Q2 earnings performance

Revenue grew by 6% year-on-year in Q2 and was distributed fairly evenly across both segments (almost in line with our estimates). The 5% volume-driven growth in Food Solutions was a qualitatively good performance, also considering the industrial action around the beginning of Q2 that hampered production and delivery reliability. EBIT for the seasonally weak quarter was -0.8 MEUR, down from the comparison period (-0.1 MEUR), while we expected flat earnings development. Profitability was mainly affected by temporary factors, such as the impact of industrial action on production in both segments and the increased price of raw materials in Oilseed Products. The result of the volatile associate company Sucros was clearly weaker than in the comparison period, as a result of which the net result remained at -1.4 MEUR (we estimated 0.1 MEUR). Operating cash flow improved significantly, supported by the release of working capital.

H2 outlook is more stable, next year trending upwards

Apetit reiterated its guidance for 2025, according to which the Group's operating profit is expected to decrease slightly from

the comparison year (2024: 9.3 MEUR). The company expects the availability of oilseed raw material to improve with the 2025 harvest, and rapeseed prices have also fallen in commodity exchanges, which signals an upturn in the profitability of Oilseed Products. Food Solutions, in turn, continues its volume growth, influenced by a moderate tailwind from consumption habits, export efforts, and new higher value-added products that Apetit occasionally brings to market. The company is making a 2 MEUR investment this year in the production of the Black Grain ingredient at its Kantvik plant, which will accelerate the commercialization of the ingredient. However, we have not yet factored in the revenue potential of the ingredient in our forecasts for the coming years.

If earnings development turns around, the expected return would again become attractive

Apetit is a defensive and capital-intensive company in terms of its investment profile, and its profitability fluctuates occasionally with harvest seasons and changes in the cost environment. The company is capable of growing its earnings in the long term, but due to its capital-intensive nature, we estimate that value creation will be moderate. The stock is currently valued at an EV/EBIT multiple of 10x on 2025 earnings, which we estimate will be slightly weaker than usual due to early-year strikes and raw material challenges. We are already partly looking ahead to next year (EV/EBIT 9x), when we expect earnings to strengthen, for example, through the removal of raw material-related headwinds and consistent volume growth in Food Solutions. While the current year's earnings do not offer further upside, we believe the 12-month expected return is sufficiently good. including approximately 10% earnings growth in 2026e and a 5% dividend yield. From a balance sheet perspective, P/B 0.8x is relatively inexpensive compared to our forecast normalized ROI level (2026e: ~8%).

Value drivers

- Significant market position as the only major Finnish producer of frozen vegetables and presser of vegetable oils
- Well-known Apetit brand
- The future outlook is supported by the vegetable trend, R&D investments, and capital expenditure
- Internationalization offers revenue potential

Risk factors

- Concentration and price competition in the retail sector
- Reliance on successful harvest seasons
- Potential acquisitions or investments in new product areas may fail
- Fluctuation in refining margins for sugar and vegetable oils in line with the market

Q2 earnings performance was soft due to temporary reasons

Revenue grew in both segments

Apetit reported 6% revenue growth in Q2, which was fairly evenly distributed between the two segments. Revenue was broadly at the forecast level.

Food solutions grew by 5%, supported by growth in sales volumes (we forecast 3.5%). Demand in retail has developed well and the company estimates it will benefit from the effects of national dietary recommendations on consumer behavior. The delivery reliability of Food Solutions suffered from industrial action in the early part of the quarter but normalized towards the end of the quarter.

In Oilseed Products, revenue grew by 7% (we estimated 9%), driven by sales prices, which we believe is a result of elevated raw material prices since H2 2024. However, prices have already started to decline during 2025, which had not yet affected Apetit's Q2 figures. Delivery volumes remained at the comparison period's level. The sales mix

suffered from the impact of industrial action, as production challenges limited deliveries of refined vegetable oil (suitable for food use) in Q2.

Profitability was slightly below expectations

Q2 EBIT was -0.8 MEUR, which was slightly weaker than our estimate (-0.1 MEUR). The net result of -1.4 MEUR was even more clearly below our estimate (0.1 MEUR), which was impacted by the negative result of the volatile associate company Sucros.

For both of the Group's two segments, results fell 0.3-0.4 MEUR below our estimates and also somewhat declined year-on-year. Both suffered from the adverse effects on production of industrial action, such as overtime and shift bans (in both) and strike days (in Food Solutions). Oilseed Products also suffered from increased raw material prices and a weakened sales mix.

Working capital release supported cash flow

Cash flow from operating activities in H1 was at a very strong level of 13.1 MEUR (H1'24: 6.8 MEUR). This was particularly influenced by the change in working capital, which had a positive impact of 8 MEUR on cash flow. In Q2, working capital is typically released before raw material purchases for the next harvest season, and this time the release was higher than usual. Investments in H1 were 3 MEUR, slightly higher than in the comparison period, but mostly in line with our expectations. Net cash was 1.2 MEUR at the end of H1 (H1'24: 6.3 MEUR).

Apetit, Webcast, Q2'25

We expect earnings development to stabilize in H2

No significant changes to our long-term forecasts

- Apetit reiterated its guidance for 2025, according to which the Group's operating profit is expected to decrease slightly from the comparison year (2024: 9.3 MEUR).
- The company described the 2025 crop prospects as moderate for Food Solutions. In Oilseed Products, the crop outlook is positive at least for the Baltics, and cultivation areas in Finland have also seen significant growth. We expect the profitability of Oilseed Products to normalize in H2, influenced by factors such as the recent decline in raw material prices and improved availability.
- Our H2 earnings forecast is roughly at the comparison period's level after a declining H1. The main reason for the stabilization of earnings is the dynamic described above in the price of Oilseed Products raw material. Food Solutions' result in H2 2024 was stronger than usual due to efficient seasonal production, so achieving earnings growth this year may be challenging due to high comparison figures. On the other hand, we anticipate volumes in Food Solutions to continue growing.
- Our estimates for 2026-27 remained largely unchanged. The most significant change was related to the lowering of Sucros' earnings estimates. Sucros' result fluctuates based on factors such as market prices for sugar and the domestic sugar beet harvest. Sucros' earnings contribution to Apetit in 2018-24 was on average 0.7 MEUR. Our 2025 forecast is -0.4 MEUR due to a loss-making H1, and 1 MEUR/year from 2026 onwards.

We accept a slight forward lean in the valuation

Valuation summary: Defensive, but low-margin business

Apetit is a defensive stock in terms of its investment profile, as its business is not particularly dependent on economic cycles, but on the other hand, the market's growth prospects are rather moderate. The company operates in an established and competitive market where achieving high returns is challenging. In recent years, the company has succeeded in improving its efficiency and increasing sales in favorable product categories. As a processor, the company is dependent on the crop development of domestic agriculture and the international price level of vegetable oil raw materials, which can occasionally cause earnings volatility. Our estimates for 2025 assume earnings will decline in line with the company's guidance, but we estimate the decline to be temporary and for earnings development to turn positive again in the medium term, supported by recent investments and growth initiatives.

Associated company Sucros to be considered in valuation

Apetit's valuation is complicated by the company's 20% ownership in the sugar company Sucros. The value and earnings impact of Apetit's Sucros holding are significant, so we believe that valuing the share also requires an opinion on the fair value of Sucros. When looking at enterprise value-based metrics, Sucros' fair value should be deducted from Apetit's enterprise value (EV), or otherwise, the valuation multiples will appear too high. We have valued Sucros as a separate entity in EV-based valuation methods and DCF, based on its balance sheet value and historical earnings (fair value 13 MEUR or EUR 2.1/share). This corresponds to multiples of P/B: 0.6x, P/E 2020-24:

10x and P/E 2025e: negative.

We are already partly relying on next year's estimates

We have prepared a sum-of-the-parts valuation method, as we believe it provides an illustrative tool for evaluating different elements. We assign a slightly higher valuation multiple to Food Solutions compared to Oilseed Products, as we see more growth and value creation potential in the former. With a weaker-than-normal result in 2025, the sumof-the-parts would be EUR 14.4/share. With the sum-of-theparts valuation for 2026, the upside would be to EUR 15.9, making the expected return guite attractive. As 2025 draws to a close, we are already looking ahead to next year, which we believe will better reflect Apetit's long-term normalized earnings level. We expect the earnings turnaround in H2 to act as a moderately positive driver for the share price performance. Leaning on the assumed earnings growth for 2026 somewhat increases the valuation risk, but on the other hand, we see Apetit having clearly become a more stable company in the 2020s than before, with earnings development that is moderately upward-trending in the big picture.

Disclaimer and recommendation history

The information presented in Inderes reports is obtained from several different public sources that Inderes considers to be reliable. Inderes aims to use reliable and comprehensive information, but Inderes does not guarantee the accuracy of the presented information. Any opinions, estimates and forecasts represent the views of the authors. Inderes is not responsible for the content or accuracy of the presented information. Inderes and its employees are also not responsible for the financial outcomes of investment decisions made based on the reports or any direct or indirect damage caused by the use of the information. The information used in producing the reports may change quickly. Inderes makes no commitment to announcing any potential changes to the presented information and opinions.

The reports produced by Inderes are intended for informational use only. The reports should not be construed as offers or advice to buy, sell or subscribe investment products. Customers should also understand that past performance is not a guarantee of future results. When making investment decisions, customers must base their decisions on their own research and their estimates of the factors that influence the value of the investment and take into account their objectives and financial position and use advisors as necessary. Customers are responsible for their investment decisions and their financial outcomes.

Reports produced by Inderes may not be edited, copied or made available to others in their entirety, or in part, without Inderes' written consent. No part of this report, or the report as a whole, shall be transferred or shared in any form to the United States, Canada or Japan or the citizens of the aforementioned countries. The legislation of other countries may also lay down restrictions pertaining to the distribution of the information contained in this report. Any individuals who may be subject to such restrictions must take said restrictions into account.

Inderes issues target prices for the shares it follows. The recommendation methodology used by Inderes is based on the share's 12-month expected total shareholder return (including the share price and dividends) and takes into account Inderes' view of the risk associated with the expected returns. The recommendation policy consists of four tiers: Sell, Reduce, Accumulate and Buy. As a rule, Inderes' investment recommendations and target prices are reviewed at least 2–4 times per year in connection with the companies' interim reports, but the recommendations and target prices may also be changed at other times depending on the market conditions. The issued recommendations and target prices do not guarantee that the share price will develop in line with the estimate. Inderes primarily uses the following valuation methods in determining target prices and recommendations: Cash flow analysis (DCF), valuation multiples, peer group analysis and sum of parts analysis. The valuation methods and target price criteria used are always company-specific and they may vary significantly depending on the company and (or) industry.

Inderes' recommendation policy is based on the following distribution relative to the 12-month risk-adjusted expected total shareholder return.

| Buy | The 12-month risk-adjusted expected shareholder return of |
|-----|---|
| | the share is very attractive |

Accumulate The 12-month risk-adjusted expected shareholder return of the share is attractive

Reduce The 12-month risk-adjusted expected shareholder return of

the share is weak

Sell The 12-month risk-adjusted expected shareholder return of

the share is very weak

The assessment of the 12-month risk-adjusted expected total shareholder return based on the above-mentioned definitions is company-specific and subjective. Consequently, similar 12-month expected total shareholder returns between different shares may result in different recommendations, and the recommendations and 12-month expected total shareholder returns between different shares should not be compared with each other. The counterpart of the expected total shareholder return is Inderes' view of the risk taken by the investor, which varies considerably between companies and scenarios. Thus, a high expected total shareholder return does not necessarily lead to positive performance when the risks are exceptionally high and, correspondingly, a low expected total shareholder return does not necessarily lead to a negative recommendation if Inderes considers the risks to be moderate.

The analysts who produce Inderes' research and Inderes employees cannot have 1) shareholdings that exceed the threshold of significant financial gain or 2) shareholdings exceeding 1% in any company subject to Inderes' research activities. Inderes Oyj can only own shares in the target companies it follows to the extent shown in the company's model portfolio investing real funds. All of Inderes Oyj's shareholdings are presented in itemised form in the model portfolio. Inderes Oyj does not have other shareholdings in the target companies analysed. The remuneration of the analysts who produce the analysis are not directly or indirectly linked to the issued recommendation or views. Inderes Oyj does not have investment bank operations.

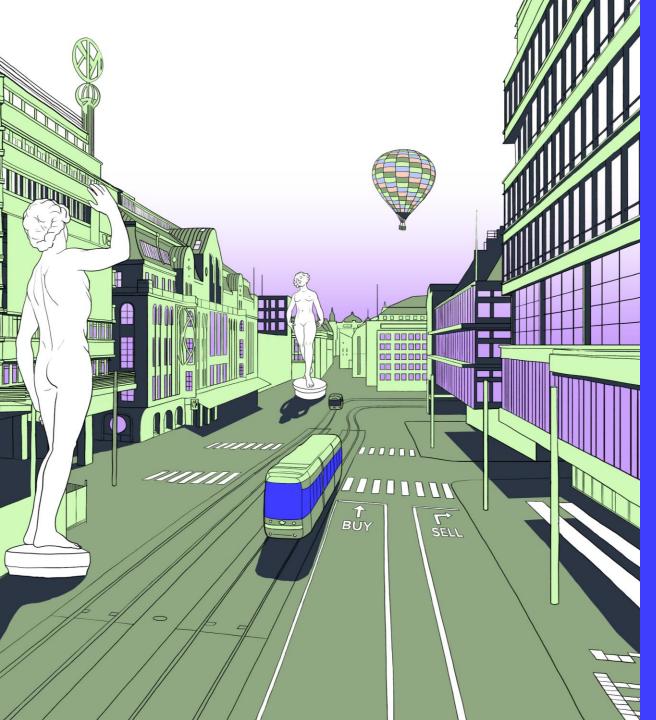

Inderes or its partners whose customer relationships may have a financial impact on Inderes may, in their business operations, seek assignments with various issuers with respect to services provided by Inderes or its partners. Thus, Inderes may be in a direct or indirect contractual relationship with an issuer that is the subject of research activities. Inderes and its partners may provide investor relations services to issuers. The aim of such services is to improve communication between the company and the capital markets. These services include the organisation of investor events, advisory services related to investor relations and the production of investor research reports.

More information about research disclaimers can be found at www.inderes.fi/research-disclaimer.

Inderes has made an agreement with the issuer and target of this report, which entails compiling a research report.
