## Company description

Roblon is a Danish-based developer of high-performance fiber solutions. It manufactures and sells strength-based elements to cable manufacturers, primarily within the fiber optic cable (FOC), oil & gas, and energy transmission cable industries. Roblon has a dual-class share structure with B-shares listed on Nasdaq Copenhagen. A-shares are owned by ES Holding Frederikshavn ApS (family of the original founders), representing 25.1% of the total share capital and 68.8% of voting rights. ATP and management own >7%, and around 4%, respectively while Nordic Compound Invest recently (5 November 2024) flagged >5% of share capital.

## Investment case

Roblon's two business units, FOC and Composite, which supply strength-based elements for cables and composite materials, are both supported by macro trends. Digitalization and a greater need for data transmission underpin the long-term growth outlook for fiber optic cables (8.5% CAGR 2023-2030<sup>[1]</sup>), while near-term greater oil & gas activity levels and longer-term green energy transition drive demand within the Composite business unit.

In connection with the announcement of the divestment of Roblon US in June 2025, the guidance for the 2024/25 financial year was upgraded for the continuing operations. The upgrade was attributed to a favorable product mix and realized productivity improvements. At the recent Q3 2024/25 Roblon narrowed the previously upgraded guidance and now expects to generate revenue of DKK 230-250m (from DKK 220-250m). EBITDA expectations is now at DKK 45-50m (from DKK 40-50m), and EBIT is now expected to reach DKK 31-36m (from DKK 26-36m). Following Q3 2024/25, order intake and the order book appear healthy, enhancing revenue visibility for 2025. Roblon's ongoing European operations may also benefit from new EU fiscal initiatives, in addition to the continued energy transition in Europe, which supports demand for composite solutions.

Compared to peers Roblon's trades at lower multiples, which may be partly explained by Roblon's much smaller size and lower margin level. The sale of its US activities may be a trigger for valuation improvement, particularly given the greater margin level of continuing operations.

## Key investment reasons

Roblon's gross margin has expanded in Q1-Q3 2024/25 compared same quarters last years supported by a favourable product mix and productivity enhancements. Margins may expand further if revenue develops positively, driven by operating leverage in its production facilities. A fairly strong orderbook and upgraded guidance indicates stronger revenue in the remainder of 2025.

Delivering on guidance and showing sustainability in the turnaround and positive EBIT can support valuation expansion, and overall increased valuation as earnings grow. Positive cash flow and net income can also support a return to dividends in line with Roblon's policy to distribute 40-50% of its net result.

The divestment of Roblon US can re-focus energies on the larger and more profitable European business, where Roblon guides for around 12-14% EBIT margin FY2024/25. The balance sheet has strengthened in 2023/24 and can further improve following the Roblon US divestment.

## Key investment risks

The divestment process related to the US operations was finalized by the end of July 2025. The loss from the divestment of Roblon US impacted Roblon's profit and loss statement for Q1-Q3 2024/25 by approximately DKK 33m and is considered more or less final. However, the loan extended to the new owners of Roblon US—and the associated repayment—carries a degree of risk in the coming years.

There is a risk that Roblon can face top-down pressure from its customers, squeezing margins if its larger end customers exert their greater market power. While Roblon's products are somewhat specialized, they are, to some extent, price takers in an industry dominated by large players such as Prysmian, Nexans, NKT, Baker Hughes, Technip etc.

The US FOC market has faced increasing competitive pressure, particularly from lower-cost Asian producers. While gross margins in Europe remain strong, lower-cost producers may result in similar price pressures in the future.

Note: Data from 26/09/2025. Source: S&P Capital IQ. No adjustments have been made for differences in fiscal calendars. Roblon's financial year: 1 November - 31 October. Market cap and EV include non-listed shares. Toray industries has skewed reporting from 1 April to 31 March, as such Toray's results are shifted with T+1, as its 2024/25 are more closely comparable with Roblon's FY2023/24 results.

# Appendix

**Estimates and assumptions:** The data in the peer group concerning the peer companies has not been calculated by HC Andersen Capital but is instead consensus analyst estimates from S&P Capital IQ. HC Andersen Capital assumes no responsibility for the correctness of the numbers in the peer group; however, considers S&P Capital IQ a credible source of information. Note: \*The forward earnings multiples numbers for Roblon, EV/Sales, EV/EBITDA, and EV/EBIT, have been calculated by HC Andersen Capital, assuming Roblon will recognise it's the midpoint of its FY2024/25E guidance, reflecting a topline growth of approx. -2%, with EBITDA before special items of DKK 47.5m and EBIT before special items of DKK33.5m. Given that the estimates closely track Roblon's own estimates, they rely on the assumptions outlined in Roblon's 2024/25 financial reporting regarding forward-looking statements.

## Selected cable component manufacturing peers overview:

**Avient Corp:** was formed from the merger of PolyOne Corp and Clariant Colour in 2020. It is a US-based global manufacturer of specialised polymer materials, which include thermoplastic compounds, specialty resins, specialty polymer formulations, engineered films, and colour and additive systems. Avient Corp acquired Fiber-Line Inc, a Roblon peer, in 2019, giving it an entry to the high-performance fiber solutions market.

**Coats Group Plc:** is a United Kingdom-based industrial thread company. The Company's segment includes Apparel & Footwear, and Performance Materials. It provides complementary products, services and software solutions to the apparel and footwear (A&F) industries. Coats Group Plc acquired Gotex SA, a Roblon peer, in 2016, giving it an entry to the high-performance fiber solutions market.

**Toray Industries, Inc:** is a Japan-based global leader in advanced materials. The company operates across a wide range of sectors, including fibers & textiles, plastics & chemicals, and life sciences. Toray Industries includes a fiber business, where the company serves a range of of industries with strength-based aramid fibers and carbon fiber composites. Toray industries is global and diversified across industrial and chemical products, however, its production of high-performance strength-based fibers enables some comparison to Roblon.
